 BNSF Coal Unit Train and Trainload Mileage Table

Per Items 3381 and 3383 of BNSF Rules Book 6100, the following BNSF Mileage Table will be used to determine rail miles between a shipment's billed origin and destination for the purpose of calculating the Coal Mileage - Based Fuel Surcharge (CMBFS) applying on Coal Unit Train and Trainload Shipments. Mileages in this table apply only to the calculation of the CMBFS.

 BNSF Coal Unit Train and Trainload Mileage Table

Per Items 3381 and 3383 of BNSF Rules Book 6100, the following BNSF Mileage Table will be used to determine rail miles between a shipment's billed origin and destination for the purpose of calculating the Coal Mileage - Based Fuel Surcharge (CMBFS) applying on Coal Unit Train and Trainload Shipments. Mileages in this table apply only to the calculation of the CMBFS.

 BNSF Coal Unit Train and Trainload Mileage Table

Per Items 3381 and 3383 of BNSF Rules Book 6100, the following BNSF Mileage Table will be used to determine rail miles between a shipment's billed origin and destination for the purpose of calculating the Coal Mileage - Based Fuel Surcharge (CMBFS) applying on Coal Unit Train and Trainload Shipments. Mileages in this table apply only to the calculation of the CMBFS.

BNSF Coal Unit Train and Trainload Mileage Table

Per Items 3381 and 3383 of BNSF Rules Book 6100, the following BNSF Mileage Table will be used to determine rail miles between a shipment's billed origin and destination for the purpose of calculating the Coal Mileage - Based Fuel Surcharge (CMBFS) applying on Coal Unit Train and Trainload Shipments. Mileages in this table apply only to the calculation of the CMBFS.
